# PSE's & Mouldings Terminology

**Q-Pack:**

A set piece pack of approximately 1 cubic metre of product, providing price advantage without compromising on quality.

**Contract Grade:**

In principle, free of all hit and miss. There may be a higher occurrence of knots, some of which may be large, black or loose. Products may be manufactured from larger sections that have been resawn. Typically manufactured from resawn fifth redwood or equivalent. Where indicated, whitewood may be used.

**Premium Grade:**

In principle, free of all hit and miss. Knots, if present, will be sound and appropriate to the cross section. Typically, larger sizes will be taken from good fifth redwood or equivalent. 25mm sizes will be manufactured from selected boards or re-cut unsorted redwood at our option. Smaller sections will be taken from unsorted redwood that is re-sawn from a thicker section. Where indicated, sawfalling whitewood may be used.

**Premium Plus Grade:**

In principle, free of all hit and miss. Knots, if present, will be sound and small in relation to the cross section. Typically manufactured from unsorted redwood.

**MB:** Mixed lengths but only 1 per bundle

**TB:** Truck bundled/Random lengths

**LP:** Length packaged. 1 or 2 lengths per pack

**TB/LP:** Option to supply either

**DSL:** Door set lengths. Option to supply 4.2, 4.5, 5.1 & 5.4m lengths

**Moisture content**

Solid pine timber, which is a natural product containing moisture, is dried artificially after the initial logging process, causing the wood to shrink.

A certain amount of residual drying and shrinkage continues until stabilisation is reached. In a centrally heated home, lateral shrinkage of 2.5 – 3% is quite normal for new machined profiles.
