

Hoppings

QUALITY PRODUCTS

PRODUCT GUIDE: PSE (Planed Square Edged)

Why Choose Hoppings Softwood PSEs?

- Selected & graded quality timber
- Quality of machined finish
- Consistency of product quality
- End marking of products with length, grade and brand logo.
- A wide range of sizes and grades to suit the varying needs of tradesmen
- Products available as FSC®/PEFC certified on request.

PSE's & Mouldings Terminology

Q-Pack: A set piece pack of approximately 1 cubic metre of product, providing price advantage without compromising on quality.

Contract Grade: In principle, free of all hit and miss. There may be a higher occurrence of knots, some of which may be large, black or loose. Products may be manufactured from larger sections that have been resawn. Typically manufactured from resawn fifth redwood or equivalent. Where indicated, whitewood may be used.

Premium Grade: In principle, free of all hit and miss. Knots, if present, will be sound and appropriate to the cross section. Typically, larger sizes will be taken from good fifth redwood or equivalent. 25mm sizes will be manufactured from selected boards or re-cut unsorted redwood at our option. Smaller sections will be taken from unsorted redwood that is re-sawn from a thicker section. Where indicated, sawfalling whitewood may be used.

Premium Plus Grade: In principle, free of all hit and miss. Knots, if present, will be sound and small in relation to the cross section. Typically manufactured from unsorted redwood.

PSE: Planed Square Edge

MB: Mixed lengths but only 1 per bundle

TB: Truck bundled/Random lengths

LP: Length packaged. 1 or 2 lengths per pack

TB/LP: Option to supply either

DSL: Door set lengths. Option to supply 4.2, 4.5, 5.1 & 5.4m lengths

Moisture content

Solid pine timber, which is a natural product containing moisture, is dried artificially after the initial logging process, causing the wood to shrink. A certain amount of residual drying and shrinkage continues until stabilisation is reached. In a centrally heated home, lateral shrinkage of 2.5 – 3% is quite normal for new machined profiles.
